

## IOS LEAD FULL STACK DEVELOPER

VEME IS LOOKING FOR A MID–SENIOR IOS DEVELOPER

The Veme App is an all-in-one platform to create, share and engage with vemes (aka video memes)

Veme is focused on creating workplaces that people love coming to every day. We are bold, fun, adventurous people, and our group dynamics are as important to us as our end product.

### YOUR RESPONSIBILITIES

- Drive monthly feature releases to the App Store
- Organize bug fixes that ship multiple times per week
- Consistently refactoring code and making sure code documentation is done thoroughly
- Aligning talent resources to tasks within a project
- Help develop A/B tests (apptimize, appsee)
- Coordinate with QA & dev team to fix reported bugs
- Manage unit testing
- Set KPI targets and measure performance

### SKILLS YOU NEED

- +4 years of proven experience in iOS development with the latest iOS SDKs
- Extensive experience with Objective C and Swift
- JavaScript experience a plus
- Familiarity with Core Functionalities of AVFoundation framework, core video, core image
- Experience working with video and image processing, as well as Codec and Compression methodologies
- Have sound knowledge of S3 Bucket, Video Streaming and Players
- A broad technology footprint, including a good background in object oriented programming
- Must know MVC Architecture and high standard coding with reusable and modular code components
- Experience with both Agile and Scrum Methodologies
- Post-Secondary education not a requirement; it's more important to show us what you've built
